COSIMO DE PINTO, ITALY

All the information in this case study was generously provided by Cosimo de Pinto from Rome. Cosimo works in law enforcement. He used Belkasoft Evidence Center to investigate a case of international pedophilia and sexual violence.

The **business challenges** that led Cosimo to evaluate and use Belkasoft Evidence Center:

- Analyzing large amounts of data
- Performing repetitive search operations
- Retrieving crucial information within a timeframe
- Encrypted devices

> *Evidence Center allowed me to retrieve crucial information and photos for the investigations.*

Cosimo de Pinto finds the following BEC viewers the most useful in solving cases:

- SQLite Viewer
- Social connection graph
- Timeline
- Registry Viewer

The **benefits** Cosimo has experienced using Belkasoft products:

- Amount of artifacts and data types supported out of the box
- Advanced low-level analysis
- Social graph and communities detection
- Fast data extraction

General impression

"The powerful script tool present in Evidence Center has allowed to automate the repetitive search operations and a consequent considerable time saving at least for the basic operations."
