

MOSSARAF ZAMAN KHAN, GFSU, INDIA

This case study was generously provided by Mossaraf Zaman Khan from Gujarat Forensic Sciences University. GFSU is located in India and uses BEC to investigate computer crime.

The **business challenges** that led GFSU to evaluate and use Belkasoft Evidence Center:

- Delivering results in time
- Finding all relevant data

BEC really helps us to solve the hidden crime.

Mossaraf Zaman Khan finds the following BEC viewers the most useful in solving cases:

- Dashboard
- Case explorer

The **benefits** Mossaraf Zaman Khan has experienced using Belkasoft products:

- Simple user interface
- Comprehensive Live RAM analysis
- Analysis of processes and malware
- Amount of artifacts and data types supported out of the box
- Fast data extraction

General impression

"I am a Cyber Forensic Professional. I'm using Belkasoft Evidence Centre for analyzing volatile memory. Belkasoft Ram Capturer is also good to capture the memory. Evidence Center helps to easily find the hidden artifacts. And the best thing is, it divides the artifacts category wise. This product of Belkasoft takes the volatile memory analysis to the next level. Maybe I am going to use this software's for my research purposes. Thank you Belkasoft Team, for this amazing product. It really helps us to solve the hidden crime."
